

Business Plan: Revenabled Sales Enablement Platform

Executive Summary: Revenabled is a Sales Enablement Agency that deploys AI-powered sales infrastructure for startups, SMBs, and growth-stage companies. It offers CRM integration, sales automation, lead generation, email deliverability optimization, and AI agent deployment to create repeatable and scalable revenue systems. The goal is to make RevEnabled the go-to agency and platform for building modern sales stacks.

Business Model:

- **Target Customers:** B2B companies, SaaS startups, consultants, service agencies
 - **Revenue Streams:**
 - One-time setup packages (CRM, email, AI)
 - Monthly retainers for automation, lead gen, and GPT optimization
 - Custom AI Agent builds (\$2.5K+ per bot)
 - Fractional Head of Sales (\$5K/mo)
 - **Channels:** Website (Softr or WordPress), LinkedIn, email campaigns, Google Ads
 - **Customer Relationships:** Personalized onboarding, client portals, AI-generated reports, ongoing check-ins
 - **Key Partners:** OpenAI, HubSpot, Zoho, Apollo, HeyGen, Make.com, Vercel
 - **Key Resources:** Internal CRM/automation team, AI engineers, outbound team, agency dashboard
-

Product Specification Document

Core Products:

1. **CRM Integration & Setup**
 - Tools: HubSpot, Zoho, Salesforce
 - Tasks: Configure properties, workflows, pipelines, import contacts
2. **Email Domain Warmup**
 - Tools: Route53, Resend, Mailwarm
 - Tasks: Setup DNS (SPF, DKIM, DMARC), warm domain, monitor health
3. **Sales Automation Setup**
 - Tools: Apollo, Reply.io, Make.com
 - Tasks: Create sequences, upload leads, schedule outreach
4. **Lead Generation**
 - Tools: Apollo, LinkedIn Sales Navigator
 - Tasks: Create ICP, scrape leads, qualify and enrich, upload to CRM
5. **AI Agent Setup**
 - Tools: OpenAI Assistants API, Google AI Studio, Make.com

- Tasks: Deploy GPTs for outreach, response handling, onboarding, reports
- 6. Reporting & Optimization**
- KPI Dashboards (emails sent, opens, replies, conversions)
 - Tools: Supabase, Chart.js, Google Sheets, Airtable

Platform Tech Stack:

- Frontend: React + Tailwind (via Vercel or v0.dev)
 - Backend: Node.js + Supabase (or PostgreSQL)
 - Automation: Make.com + OpenAI API
 - CMS/Client Portal: Softr or WordPress
-

Go-to-Market Plan:

Phase 1: Build & Test (Week 1-2)

- Launch V1 on WordPress or Softr
- \$50 Google Ad Campaign targeting B2B SaaS and consultants
- Personal LinkedIn outreach + email sequence to 200 prospects
- Create demo video and walkthrough case studies

Phase 2: Launch (Week 3-4)

- Public launch on Product Hunt, Reddit, IndieHackers
- Showcase demo GPTs and automation templates
- Activate referral partner program (20% commission)
- Continue lead scraping + targeted outreach via Apollo

Phase 3: Scale (Month 2-3)

- Publish weekly LinkedIn and YouTube content (automation builds, AI tutorials)
 - Launch newsletter with AI tools + sales enablement tips
 - Paid campaigns on Google Ads and Meta
 - Secure 10 clients on monthly retainers
-

Step-by-Step Instructions to Build the Platform:

Step 1: Domain and Hosting

- Buy domain on Vercel or GoDaddy (e.g., revenabled.ai)
- Set up hosting with Vercel or WordPress + Elementor

Step 2: CRM & Email Setup

- Pick CRM (HubSpot Free or Zoho)
- Setup email domain via Route53 or Resend
- Configure DNS: SPF, DKIM, DMARC
- Warmup using Mailwarm or Warmbox

Step 3: Website & Client Portal

- Use Softr or WordPress + MemberPress
- Create dashboards with Airtable views per client
- Embed contracts, GPT chatbots, reports

Step 4: Automation & Outreach Tools

- Integrate Make.com with CRM and Google Sheets
- Create automation for:
 - Lead upload
 - Email send (Resend/Apollo)
 - Daily reporting via Chart.js or Sheets

Step 5: Custom GPT Deployment

- Use OpenAI Custom GPT Builder or Assistants API
- Setup agent with:
 - Intake form builder
 - Outreach sequencer
 - Meeting summary + AI insights
- Embed assistant in portal or iframe

Step 6: Onboarding and Reports

- Use Make or Zapier to:
 - Trigger onboarding messages
 - Send sales performance reports
 - Update Airtable based on replies

Plugins to Use:

- **WordPress:** Elementor, WPForms, MemberPress, WPCode
- **CRM Integration:** Make.com or Zapier
- **Email:** Resend, Google Workspace, Mailwarm
- **Automation:** Make.com, OpenAI Assistants API, Zapier
- **Forms:** Typeform or Softr Forms
- **Analytics:** Chart.js, Google Analytics, Plausible

Outreach Strategy with \$50 Google Ad Credit:

- Use keyword targeting: "B2B Sales Automation," "AI sales tools," "CRM setup for startups"
- Create 3 headlines: "Struggling with Sales?", "Automate Your Sales Funnel", "Launch in 7 Days"
- Link to a Softr landing page with a call to action (free audit or demo)
- A/B test landing page variants with different CTAs
- Use Apollo and LinkedIn Sales Navigator to manually follow up with ad click leads
