

Use Case 1: Founder-Led Startups Needing Predictable Pipeline

Target Persona: The Scrappy SaaS Founder (Seed → Series B, 10–150 employees, \$1M–\$20M ARR)

Business Challenge

Early-stage SaaS founders juggle fundraising, product roadmap, and early GTM. Outbound is inconsistent, often handled by founders or junior SDRs, with poor CRM adoption and unproven messaging. Investors demand predictable pipeline, but there's no repeatable outbound motion.

RevEnabled Capability → Solution

- **Essentials Package:** 7–21 day outbound launch
- CRM setup (HubSpot/Pipedrive), domain warmup, and basic automations
- Founder-to-founder style outreach messaging
- Sales playbook + assets to shorten cycles

Outcomes / KPIs Impacted

- 20–30%+ reply rates with steady meetings
- Faster speed-to-pipeline → next funding milestone
- Pipeline predictability for investor confidence

Why It Matters

Founders reduce reliance on themselves for outbound, prove repeatability to investors, and free time to focus on product and fundraising.

Use Case 2: Mid-Market Services Firms Expanding Beyond Referrals

Target Persona: The Pipeline-Plateaued Sales Leader (50–500 employees, \$10M–\$50M revenue, Professional Services/IT/Agencies)

Business Challenge

Sales teams rely too heavily on referrals, resulting in a lumpy pipeline. SDRs underperform, turnover is costly, and CRM data is chaotic. Leadership lacks visibility into forecasts and wants to scale outbound without ballooning SDR costs.

RevEnabled Capability → Solution

- **Professional Package:** Complete outbound solution
- Advanced CRM and automation setup
- Persona-based outreach messaging across 2 ICPs
- 1,000 enriched leads per month + SDR playbooks
- ROI framing: compare SDR hiring vs. RevEnabled

Outcomes / KPIs Impacted

- Diversified pipeline with steady meeting flow
- Reduced SDR cost per meeting booked
- Improved win rates with stronger playbooks + assets
- Forecast accuracy and pipeline visibility

Why It Matters

Sales leaders can scale revenue growth beyond referrals, control SDR costs, and hit predictable targets with a proven framework.

Use Case 3: Growth-Stage Scaleups

Standardizing Outbound

Target Persona: The Scale-Minded RevOps Leader (200–2,000 employees, \$50M–\$500M ARR, Pre-IPO SaaS/Tech Services)

Business Challenge

Outbound exists but execution is inconsistent across regions. Tech stack complexity and fragmented enablement slow rep productivity. Leadership needs IPO-level reporting clarity, global standardization, and automation at scale.

RevEnabled Capability → Solution

- **Enterprise Package:** Full-scale outbound sales operation
- Custom CRM platform + automation stack (Make.com, Resend)
- Persona-based outreach for 3+ ICPs
- 2,000+ enriched leads monthly
- Comprehensive global playbooks

Outcomes / KPIs Impacted

- SDR productivity gains (meetings booked per rep/month)
- Standardized outbound across global orgs
- Consolidated tech stack with streamlined reporting
- IPO-readiness through efficiency + governance

Why It Matters

RevOps leaders can unify GTM systems, ensure scalability across markets, and prove operational maturity to investors and boards.
